**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of McComas et al '721, Jeutter et al, Raghaven et al, or Farmer et al. APA is the process discussed in the first few pages of the specification. This includes the removal of an outer coat from an inner coat with past processes damaging the inner coat. Each of the secondary references solves this problem by disclosing a similar process including removal of an outer coating with the use of a liquid jet. In order to properly remove an outer coating, it would have been obvious for one of ordinary skill in the art to modify APA by using a liquid jet to remove the outer coating, taught to be desirable by each of the secondary references. The remaining limitations would then have been obvious design choices only. For example, the exact pressure of the liquid jet and the jet angle would have been obvious based on several factors such as material being treated and desired end results.
